
April Supplemental Learning

Through Jesus, we have new life!

Now that the snow is melted (fingers crossed), take time this month to enjoy the wonder of all the new life around you. Stop and appreciate the flowers that are blooming, the buds on the trees, and the sun shining longer and brighter.

God has created all of this for us and through His Son, Jesus, we also have new life! We need to learn to respect the world God gave us. Here are some ideas, but we are sure you have some as well:

- Plant a flower or tree
- Visit a local park and examine the flora and fauna in the area
- Discover the web of life and discuss the many ways that plants and animals are connected
- As a family, search for ways to save energy at home to become more environmentally-friendly
- Pick up litter
- Recycle what you can
